

CRUSHING & SCREENING

ABBA Plant Hire have carried out numerous Crushing & Screening projects.

Done in conjunction with demolition, materials once thought of as waste can now be recycled, saving the environment, costs associated with removal of waste from site, landfill charges and the need to source replacement materials.

Contract site clearance is priced on an individual basis and a site visit is essential to assess how we can best manage the project.

All works are undertaken and supervised in house by our directly employed labour and qualified drivers.

Crushers & Screens can also be supplied on a self-drive basis.
