

PROJECT SHEET

SNOW CLEARANCE

ABBA Plant Hire have carried out numerous snow clearance projects.

With winters becoming harsher it's essential to plan ahead and predict snow fall by monitoring data from the Met Office to ensure the safety and comfort of the general public.

We have worked in conjunction with local authorities, retailers and schools and have provided manual and mechanical recourses to ensure that fallen snow has been removed from car parks, footpaths and public areas and moved to on-site locations to allow the snow to melt and drain away naturally.

Large volumes of snow can be cleared using purpose built equipment operated by trained and certificated drivers.

Events can be project managed and supervised by Abba and men and machines can be on standby 24 hours per day to ensure the smooth running of your event.

Snow doesn't just fall during the day and a service can be supplied round the clock with a 24 call-out number available.
